BeVera

Technical and Professional Health-Focused Support Services

About BeVera

BeVera Solutions is a veteran-owned, SBA 8(a) certified small business dedicated to delivering mission-critical, technical and professional support services to address the challenges facing our nation's health and human services agencies. BeVera is laser focused on providing highly-qualified resources and highly-responsive management which has enabled BeVera to successfully perform on 24 prime contracts and over 40 data science training orders within HHS.

Our Customers

BeVera is dedicated to providing mission-critical support services for all aspects of our customers' mission. BeVera successfully performs as a prime contractor for the following HHS/CDC centers:

- Global Health Center
- National Center for Emerging, Zoonotic, and Infectious Diseases
- National Center for Immunization and Respiratory Diseases
- National Center for Injury Prevention and Control
- National Center for Environmental Health

- National Institute for Occupational Safety and Health
- National Center for Chronic Disease Prevention
- Office of Communications
- Agency for Toxic Substances and Disease Registry
- Human Resources Office / CDC University

Our Work

Data Management and Analysis: BeVera specializes in Data Quality Support Services, delivering comprehensive program evaluation planning, data analysis, and result presentation focused on improving health and healthcare science. Additionally, we provide vital support by enhancing access, integration, analysis, and visualization of data. Our skilled data specialists possess expertise in a wide arrayof management and analysis techniques, which include:

- Data Visualization
- Statistical Analysis
- Formative & Process Research

- Impact Evaluation
- Data Integration
- Data Quality Assurance

Health Communications: With a strong background in health communication, BeVera offers a comprehensive range of services tailored to effectively promote our clients' projects, programs, and initiatives. We are successfully delivering expert health communications services to multiple CIO's related to Global Immunization and Reproductive Health. Our services include:

- Technical Writing/Editing
- Speechwriting
- Media/Social Media Engagement

- Infographic/Data Design
- Publication Development

- Presentation Design
- Web Content Design/Management

Epidemiology: BeVera performs primary and secondary data analysis and synthesis from disease surveillance and studies on behalf of NCEZID's One Health Office. Our experts also monitor program and health objectives and provide epidemiology training to country-level partners to strengthen surveillance systems as a part of GHC's Division of Global HIV and TB's (DGHT) international surveillance efforts. In addition, we are providing critical epidemiological services to combat Malaria in over 25 sub-Saharan countries for GHC's Division of Parasitic Diseases and Malaria (DPMD). Our services include:

- Disease Surveillance and Monitoring
- Study Design and Implementation
- Data Analysis and Interpretation
- Public Health Investigations
- Risk Assessment and Communication
- Epidemiological Modeling

Public Health Informatics: BeVera has assembled an unparalleled team of informatics experts with decades of experience leading and supporting evolving informatics initiatives. These initiatives include CDC's Data Modernization Initiative (DMI), EHRs and Public Health Integration, Public Health FHIR Implementation Collaborative, and CDC's Data Science Academy. In addition, BeVera has supported over 120 Data Science Projects leveraging open source applications and tools. Our services include:

- DMI Leadership (SME)
- Data Standards Management
- Health IT Policy Support
- Emergency Response Support
- Public Health Clinical Decision Support
- Data Science Project Support
- HL7® FHIR® Implementation in Public Health
- EHR and Public Health Data Integration Support

Technical Staffing: BeVera specializes in offering high-quality technical staffing solutions to fulfill the diverse needs of our federal government clients. Our extensive candidate pool allows us to meet the immediate demands of our clients. Our candidate pool includes, but is not limited to the following labor categories:

- Data Analysts / Statisticians
- Health Communication Specialists
- Public Health Analysts
- Data Managers / Data Scientists
- Budget/Financial Analysts
- Epidemiologists
- Technical Writers/Editors
- Subject Matter Experts
- IT Support Specialists
- 508 Compliance Specialists
- International Health Scientists
- Administrative Assistants
