ABOUT US

Rymarc Construction Inc. is a reputable and experienced construction company dedicated to delivering high-quality construction services to government agencies. With a reputation built on excellence, innovation, and reliability, we bring a unique combination of expertise, reliability, and a commitment to excellence to every project. As a proud participant in the Small Business Administration (SBA) 8(a) program, we offer the benefits of a certified small business while delivering the capabilities of a seasoned industry player.

CAPABILITIES

General Contracting: We specialize in comprehensive general contracting services, covering building construction, renovations, demolition, and infrastructure development. Our team leverages extensive experience to ensure the successful completion of diverse projects, meeting and exceeding client expectations.

Design-Build Solutions: We excel in streamlined design-build solutions, minimizing costs, and providing a seamless construction experience.

Specialized Construction Services: Offering specialized services in concrete construction, steel structures, and sustainable building practices, we adapt to unique project needs, staying at the forefront of industry advancements.

Project Management: Our robust project management ensures on-time delivery, adherence to budgets, and maintenance of quality standards. Our dedicated team ensures successful project outcomes.

Other Specialized Services: We provide janitorial services at multiple government facilities throughout the state. We also offer vehicle and equipment sustainment, materials procurement support, batch plant management, and operations support for our customers.

US Army Corps of Engineers Safety Award

“For their commitment to safety and occupational health while executing various construction contracts for operations division during FY 20.”

“Rymarc Construction demonstrated a steadfast commitment to the health and safety of all personnel involved in a diverse scope of projects throughout the Albuquerque district. Although additional safety and occupational health measures were required during the on-going global pandemic, projects ranging from painting elevated water tanks, improvements on potable water distribution system and construction of a large equipment storage building were completed without reportable accidents.”

-Tracy L. Wolf, Chief, Safety and Occupational Health

Mission Statement:
