## Past Experience

At PMCG, we provide our customers with exceptional, innovative, and forward-thinking professional services across the globe.

### Professional Management Support Services

PMCG provides mission-critical administrative, technical, and programmatic support services to several USAID bureaus and offices, including the Office of the Administrator, Office of the Executive Secretariat, and the Office of Budget Resource Management. We enable continuous operations globally with high reliability, capability, and availability.

### Cybersecurity

We provide cybersecurity-related strategic planning, training, and implementing activities to improve the cybersecurity posture of USAID implementing partners and beneficiaries around the world.

### Technical and Professional Support Services

PMCG provides administrative, communication, analytical, professional, and technical support services for program design, implementation, and evaluation to meet USAID's development and humanitarian assistance responsibilities.

### Medical Operations

PMCG supports DHA's pathology, radiology, and oncology clinical operations at Walter Reed, and helps the agency engage patients through process analysis and marketing services for the DHA National Capitol Region (NCR) Medical Directorate.

### Strategic Communications

We support Army CECOM and its senior leaders with strategic communications capabilities including executive communications, speech preparation, event planning, publications, technical writing, and graphic design.

### Global Immunizations

We provide professional, technical, and SME support to the CDC-Ethiopia Immunization Program and help the program effectively partner to ensure widespread immunization against measles.

### COVID-19 Support

PMCG supports CDC's work in South Sudan focused on strengthening the response to COVID-19 and other infectious diseases. We assist with strengthening pandemic preparedness and response, disease surveillance, and with building out the workforce and national laboratory infrastructure needed to quickly address public health crises.
