

## **Marketing Capability Statement**

Sigma Science, Inc. (Sigma) is a New Mexico based, NQA-1 compliant, and 8(a) certified small business. Sigma was established in 1996 to provide highly skilled, technical professionals to support the Department of Energy (DOE) national security enterprise and commercial nuclear industry. Since 1996, Sigma has been making the world a safer, cleaner, and healthier place through engineering, innovation, and science. We focus on attracting and retaining best-in-class technical experts and approach every project as an opportunity to provide high-quality, innovative solutions that exceed our client's expectations. We leverage our past performance, reputation for excellence, and extensive networking relationships with clients and teaming partners to continuously explore new opportunities. Sigma is continually focused on utilizing our core capabilities to expand into other government and commercial markets.

Sigma specializes in the following technical and professional services: nuclear surety & safety, information technology & cybersecurity, mission assurance, nuclear security & non-proliferation, and environmental management.
