DELLTechnologies
PLATINUM PARTNER

ABOUT US

MCP Computer Products, Inc., a Woman-Owned Small Business (WOSB), is a single source provider of leading-edge technologies and deployable solutions to the federal government. We partner with leading manufacturers through secure supply chains while maintaining a network of established relationships and contract vehicles. We achieve this through our strategic partnerships and promote change that will move your agency closer to its goals with significant savings.

MCP assists government agencies with the most sophisticated IT asset purchasing, longterm planning, technical solutions, project management, and compliance reporting. Adhering to the latest government compliance and standards, we proiritize the security of the supply chain with proactive management deliverables, an active SCRM, and an active CMMC plan. This allows MCP to meet the needs of secure classified customers and agencies with highly interactive requirements.

CONTRACTS

MCP GOV has a large portfolio of government-wide acquisition contracts, indefinite delivery, indefinite quantity (ID/IQ) and task order contracts. These flexible contracting arrangements enable MCP GOV to expedite delivery of IT services and systems to clients across the federal government.

GSS GSA V9 DELL BPA

GSA AdvantageSelect establishes pre-competed, single-award blanket purchase agreements (BPAs) under the GSA Multiple Award Schedule (MAS) Program. In accordance with FAR 8.405-3(c)(1) authorized users may place orders directly under the GSA AdvantageSelect BPAs when the need for the product(s) arises.

These standard configurations were developed by the Workstations Category Team (WCT), a consortium of over 20 federal agencies established by the Office of Management and Budget (OMB).

Fully Competed, Single Award BPA
- NON Manufacturer WAIVER on file
- Active SCRM (Supply Chain Risk Managment) plan - NIST ISO 800-161
- NO DELL brand name J&A required. The requirement was brand name or Equal. The BPAs are single award. The awards were previously competed and in accordance with FAR 405-3(c)(1), authorized users may place orders directly under the established BPA when the need for the supply or service arises. The sources were selected using low price technically acceptable evaluation criteria.

SEWP V

The NASA SEWP (Solutions for Enterprise-Wide Procurement) GWAC (Government-Wide Acquisition Contract) is a federal contract vehicle established under NASA's Executive Agent designation by OMB, granted based on the Clinger Cohen Act of 1996. It offers Information Technology (IT) products and services to all Federal Agencies and approved contractors, promoting fair opportunity for contractors in accordance with FAR 16.505(b). SEWP utilizes an online RFI/RFQ tool to facilitate this process, automatically including Contract Holders within selected groups or suggested sources. With over 140 pre-competed Prime Contract Holders, including more than 110 small businesses, SEWP consistently delivers the latest in commercial ICT/AV products and services to Federal Agencies.

Compliance
- Forensic chain of custody
- Audit ready
- Legal compliance

Cost Reduction
- Save up to 60%
- Steamline budgeting process

Control
- Asset visibility
- Baked into the assets
- Immediately actionable items

CONTRACTS

GSA SCHEDULE 70

The General Services Administration (GSA) Schedule 70 is a government-wide acquisition contract that allows federal, state, local, and tribal government agencies to purchase information technology products, and services. It streamlines the procurement process, enabling government entities to efficiently acquire TAA compliant technology solutions from pre-approved vendors.

Government agencies can use the GSA Schedule 70 to simplify the procurement process, reduce costs, and access a pool of pre-qualified vendors, ultimately facilitating the acquisition of necessary IT goods and services for various government projects and initiatives.

Vendors who are awarded a GSA Schedule 70 contract have undergone a thorough evaluation to ensure they meet certain criteria and standards set by the GSA.

SBIR - STTR

Established in 2017 by the Secretary of the Air Force and reporting to the Vice Chief of Staff of the Air Force, AFWERX is a catalyst for agile Air Force engagement across industry, academia and non-traditional contributors. This is meant to create transformative opportunities and foster an Air Force culture of innovation. The ultimate aim is to solve problems and enhance the effectiveness of the Air Force. We enable thoughtful, deliberate, ground-up innovation across the Air Force. We do this through an innovation approach that combines startup urgency with the largest pool of motivated talent in the world. The goal is to uncover opportunities to improve Air Force capabilities, connect and engage the right stakeholders, and facilitate outcomes.

FIRST SOURCE II

The Department of Homeland Security (DHS) established FirstSource II as a small business-oriented Indefinite Delivery/Indefinite Quantity (IDIQ) contract vehicle, primarily focused on commercially-available Information Technology (IT) commodities, solutions, and Value-Added Reseller (VAR) services to support DHS. It encompasses several categories of IT commodities, including Small Form Factor Devices (e.g., laptops, tablets), Static Devices (e.g., desktop workstations), Domain Devices (e.g., routers, servers), Virtual Desktop Infrastructure (VDI) Devices (e.g., virtual machines), and Peripheral Devices (e.g., printers, scanners). FirstSource II is designed to serve as the preferred source for DHS to acquire these IT resources.

SERVICES & SOLUTIONS

MCP revolutionizes your entire experience, seamlessly managing every aspect of your IT assets with unparalleled expertise. From cutting-edge asset tracking and comprehensive management to precise asset tagging, efficient recycling, and everything in between. We collaborate closely with each customer to craft extraordinary solutions tailored to individual requirements.

Warranty Options
- 3, 4, and 5 year warranties.
- Mission critical warranties
- Migration services
- Accidental damage
- Localized parts for break-fix
- 24/7 priority access
- Dedicated technical account manager

Delivery Control
- Delayed/Staggered delivery
- Warehousing
- Staggered Delivery
- Lifecycle Depot
- Delivery on Demand

Recycle
- Recycling
- Disposal
- Hard drive cleaning

Packaging Services
- Asset Tagging
- Overpacking
- Additional labeling
- Multi-Pack

Imaging/Security/Configuration
- Imaging
- Autopilot
- Absolute
- BIOS
- One Drive/Storage Solutions

TAILORED SOLUTIONS FOR HARDWARE ASSETS

See, understand, and secure endpoints, everywhere. Transform dark endpoints into resilient endpoints with the cloud-based, firmware-embedded Absolute Resilience platform.

- Unmanaged warranties leads to excessive costs
- Automate workflows
- Dashboard visibility alerts

- Improved security posture
- Asset inactivity alerts
- Fewer supply chain liabailities

Replace human business processes with automation to reducing staffing and enhance capabilities.

DELL EMC POWEREDGE XR11 / XR12

1U/2U Compact, ruggedized, and certified for conditions at the edge

The Dell EMC PowerEdge XR11/XR12 server offers 3rd generation Intel® Xeon® Scalable processors built for challenging environments, including telecommunications, military, and retail. This is a ruggedized, MIL-STD, NEBS and Marine compliant 16 inches/400 mm deep 1U/2U server.

KEY ADVANTAGES:
Boost services at the edge: The XR11/XR12 offers up to 36 x86 cores, support for accelerators, DDR4, PCIe 4.0, persistent memory and up to 4 drives
Cope with challenges: Certified rugged for telco and defense applications, including dust, extreme temperatures, shock, vibration, and other environmental variants
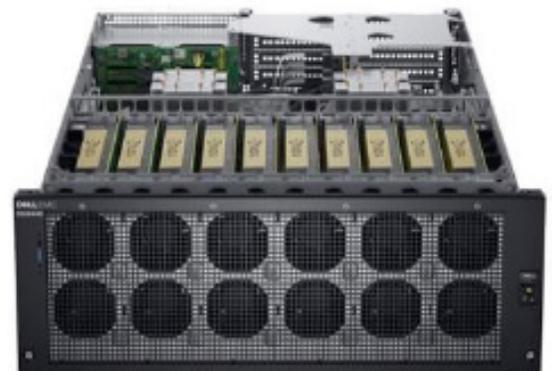

AUGMENTED INTELLIGENCE for Government

Dell EMC DSS 8440

4U Machine Learning Shared Accelerator Platform

The DSS 8440 is a 2 socket, 4U server designed to deliver exceptionally high performance for machine learning applications, with up to 10 Tensor Core GPUs, high speed PCIe fabric storage, and extensive local storage. It is ideal for machine learning training applications as well as other compute-intensive workloads.

- Tremendous machine learning horsepower
- Scale and distribute compute intensive workloads
- Open, flexible infrastructure
- Simplified management
- Dell EMC world class management, service, and support

WHAT IS A KVM?

A device to allow sharing from one keyboard/mouse and up to two displays between two or more computers/networks.

SECURE COMMAND AND CONTROL

This is a command control system with multiple data feeds, each at different levels of security. The advantages of this are:

- CAC reader to assure information security
- Speed of decision making will be improved from weeks or hours to minutes or seconds
- Significant reduction in other resources such as cooling, manpower, and electricity
- Mitigate mistakes and potential anomalies
- Reduced IT hardware and software costs

USE CASES

- Real-time geospatial data
- Multiple security levels
- Command and control
- Control rooms
- Multi-source variable information
- Manufacturing lines
- Rapid response
- Emergency centers
- Inventory control

The only full line of 4.0 products available on the approved products list (Certified for NIAP protection 4.0). Supports up to two monitors and up to 16 computers.

Modular Secure KVM Series
Smallest form factor for 2-4 kvm. TAA hardware and TAA compliant cables

Universal 2nd Generation Secure KVM Series

CONFERENCE ROOM PACKAGES

Take teamwork to the next level. We have your business covered. Customized catalogs for your organization. Bundled and discounted solutions available.

Conference room monitors, camera bars, conference hubs, speakers and more available.

- On-site and hybrid conferencing room solutions
- Built for any size meeting or any environment
- Easy to deploy, manage and use
- Flexible and customizable solutions available for your needs
- Logitech, Poly, and Crestron products available
